MACDONALD COLLEGE

FRIDAY, NOVEMBER 9, 1962

## “AQUALAQUA” BIGGEST EVER!

### TISSUE ISSUE REVIVED

The tissue issue was revived with gusto on Saturday morning in Stewart Foyer when Bev Hadley waged a spirited one woman campaign in an effort to improve tissue quality.

Decked out in a high placard which read “WE USE IT, YOU TRY IT. (SCRATCHY?)” Miss Hadley passed out samples of the provocative pulp to everyone entering the dining hall for lunch. Questioned on this manoeuvre, she explained: “Yes it is a little shocking just before a meal but I feel, for that reason, it is the most effective time.” Which we had to agree was smart campaigning.

The Home Economics Department ran several tests for the “softness quotient” and reported that it checked out at fair to rough.

While we are no Good Housekeeping Test Council, we did run a few test on it. The general consensus was that it was good to get back to the “Knowles Rolls”. In fact one tester suggested that if there were any such complaints for Brittain Hall, the complainer should be made to use the “john” in Laird. The suggestion was not adopted however, for fear that complaints would be made for ulterior motives.

Dave SMITH.

### MEMORIAL ASSEMBLY

“We are far enough away from the War to realize its unspeakable waste, its cruel slaughter, its aftermath of loneliness, sorrow, and broken hearts. Yet today the European world still totters blindly down the road to discord and misunderstanding. War today has no longer glory in its methods nor in its results. The only glory is the glory of the sacrifice for an ideal which it involves. The remembrance of the bravery of our fellow men who died for an ideal ought to remain with us as an inspiration, that we may draw strength for the duties of peace, and that the generations yet unborn may learn that by fortitude and fidelity, by endurance and determination, the darkest hour may be turned into one of radiant achievement.”

The foregoing was written by Sir Arthur Currie in 1933, before the Second World War, yet how appropriate it is for the war in 1962.

Since 1917 it has been the custom each year at Macdonald to hold a Memorial Assembly. The Assembly consists of an address by a well known person. The express purpose of these addresses is to promote an understanding of national and world affairs, and to inspire future Macdonald men and women to do their part toward the maintenance of freedom, the tolerance and the improvement of human relationships.

This year's Memorial Assembly is to be held at 8:00 P.M. on Monday, November 19, in the assembly hall. We are fortunate in having as our speaker the Rt. Hon. Philip Noel-Baker, Nobel Peace Prize winner and former British Member of Parliament. Take advantage of the opportunity to hear Mr. Noel-Baker. Plan to attend the Memorial Assembly.

### DRAMA UNDER FIRE

In recent weeks, a controversy has arisen involving the Green and Gold and the Drama Club. It was suggested, first of all, that the two organizations combine. Next, it was presented as a “fait accompli” when it was published in the “Faill-Ye Times,” Oct. 26, at the executives for the two organizations were one and the same. The reason for this (and I quote from the article) was that “a majority of the people who were interested in the Green and Gold are also those interested in the Drama Club”.

To begin with, I do not believe that the people who were involved with the Green and Gold last year were very much involved, if at all, with the Drama Club. If I remember correctly, Mr. Keith Armstrong, the president of the Drama Club of last year, had nothing to do with the Green and Gold. Neither had the majority of the Drama Club's membership. Thus, from past experience, one can see that it is not the same people necessarily that are interested in both affairs. If anyone doubts these statements, that person might advantage consult a person who belonged to the Drama Club last year.

Next, if the Drama Club and the Green and Gold were to be combined, it would involve constitutional changes to the Lit. and Deb. Constitution, and to the Student Council Constitution. Whereas this is far from impossible, it would seem to be a lot of needless bother. It is much easier to leave things as they are; anyhow, this seemed quite a workable scheme; it needed no change. Thus, the combined executive, as it was presented in the afore-mentioned issue of this paper is entirely unconstitutional as it affects one group which is under the Lit. and Deb.'s (Drama Club) and another which is independent (Green and Gold).

Again, the combination of the two groups in the executive field seems to be a rather misguided move for the following reasons. As it stands now, the Drama Club gets and deserves the interest of those people who are truly interested in the theatre, whereas those who take prominent parts, or executive positions on the Green and Gold seem to be out for their own personal glory. This is necessarily wrong, but would not the Drama Club's usual work, taking part in an inter-varsity drama competition in the Spring, suffer? Seeing that the Green and Gold enjoys more prominence on campus, would not this very important aspect of the Drama Club's activity

(Continued on Page 5)

Tomorrow evening the Teachers are sponsoring Aqualaqua. King Neptune and his temptuous mermaids will enhance the theme of underwater beauty. This semi-formal dance will take place in the old dining room in Stewart Hall, from 9 P.M. to 1 A.M.

The executive for this dance are as follows;

Nancy PETERS	Co-Chairman
Bill ALEXANDER	Co-Chairman
Georgia LAND	Chairman of Reception
Bev McCOLL	Chairman of Programing
Sarah McCALLUM	Chairman of Refreshments
Pat McKEE	Co-Chairman of Refreshments
Reva KANNER	Chairman of Tickets
Ann WILKINS	Chairman of Publicity
Gerry TAYLOR	Chairman of Stewarts

We have all worked very hard to make this first prom of the year a big success. Now, we need your support.

The theme Aqualaqua—referring to the brimny deep—naturally lends itself to many ideas. Bonnie Eccles and her committee have really worked in the bottom of Stewart Hall, and, as I'm sure most of us have seen, the decorations are something to talk about.

Aqualaqua—meaning water—implies that the decorations will have to do with water. About ten murals are being made which will surround the old dining room. The biggest one was designed by Janet Durden, a most competent artist. The murals will be directly under the side lights around the dining hall. These lights will have blue bulbs inserted so as to give a blue-water effect.

A false ceiling of pale blue and green streamers will originate on a hula hoop attached to the middle light in the dining hall, and spread out to all parts of the room. They will be attached to the top of the murals so the pink walls won't show. A special treasure chest filled with jewels and gold, found at the bottom of the Atlantic Ocean, will be in one corner.

The fireplace and the two entrances will be transformed into underwater tunnels leading into parts of the unknown.

Fish-nets, sea shells and mobile fish hanging from the ceiling will add a little more to the atmosphere of the dance. The big attraction is a tremendous band-shell taking the formation of a sea shell covered in little sparkles.

Reva Kanner had the tickets on sale on Thursday, Nov. 1st, giving the prospective buyers ten days in which to acquire them. They are on sale in the recreation centre foyer during the hours 12 to 1. In Stewart foyer, they are on sale at these hours: 11:30-1:30 and 5:30-6:30. Numbers are on each ticket and envelope for the purpose of claiming the door prizes. The decoration on the tickets are in line with the Aqualaqua theme, bearing a netted fish on the cover. The tickets are divided as to times for dinner servings, these times being: 10:45, 11:30 and 12:00. Each time accomodating approximately 50 couples.

All in all, the ticket sales are going well.

Joy Neilson and her orchestra are going to provide us with music. They are a qualified orchestra and will give us only the best. Some of their previous engagements were at Sir George Williams University, McGill University, Semi-Centennial Dance at Macdonald, Rolls Royce, R.C.A.F., Marlborough Golf Club. So, we can expect some “out of this world” music for dancing.

An added attraction to this list is the supper. This was arranged for by Sarah McCallum and Pat McGee. It will consist of hot Bar-B-Q chicken, salad, roll, a square and coffee. This delicious meal will be included in the \$3.50 per couple.

This year's Teachers Prom, as you will see tomorrow night, will be the greatest ever!

So, let's see you all there.

ANN WILKINS,  
Chairman of Publicity.

### TO WHOM IT MAY CONCERN:

All of us have at one time or another heard the expression “Practise what you preach”. However, it appears that few people ever fulfil this self-standard.

I am referring to the atmosphere in the classrooms of Macdonald College. Most people enter these classrooms with the attitude of being prepared to be bored, or of being too tired to care. Lately, after an half-hour everyone is so tired from the stench of dry, warm air that he practically expires on the floor.

Ironical in itself is the fact that nearly every lecturer at one stage of the course expounds upon the necessity of keeping a constant flow of fresh air in the classroom to keep the pupils alert and attentive. Yet these same people do not take any steps to see that their own classroom atmosphere is healthy — not even the English Professor who claimed that he couldn't think at temperatures over 65 degrees.

For those delicate creatures who foul the-attempts of all others by closing all opened windows, “Why don't you sit away from the windows, or wear a fur coat to lectures?” Then those of us who can't tolerate the putrid atmosphere could for once survive a lecture without having to take glucose pills or pinch our thighs as for myself, I'm going to start bringing a pillow to lectures.

Barry McGowan

Joy Neilson and her band taken at a recent engagement. This well-known band will be performing at the Teachers' Prom, (see article above) Saturday Nov. 10.

# EDITORIALS . . . . . COMMENTS

You have probably all heard it said that colleges turn out our future leaders, and that college is supposed to develop maturity and responsibility. Robert Aris Willmot said, "Education is the apprenticeship of life." To achieve this aim, a college should be liberal to the extent that personalities can develop and mature, unhampered by rigid convention. Freedom is essential to this process. If there is none, there is no temptation, and if there is no temptation a person can not be tested and tried. For it is only in facing up to these temptations in life that a young person will fully mature.

The above is the ideal. Ah, but then there is Macdonald College, your mother and father away from home, with their rigid rules. How are we to develop into mature adults under the heavy thumb of an institution?

One of the prime examples of this heavy handedness is the compulsory attendance of lectures. Surely by the time a person reaches college he is sensible enough to realize that in order to get through a course he must attend lectures. However at his discretion he should be able to skip a few. He should realize what is best for himself, besides it is only he that suffers not the institution, if he does not attend.

As it stands now this college is a haven for the lazy. They are forced to do everything and are not required to show the slightest iota of will-power. An institute of higher learning should not cater to individuals such as these.

As students we pay a considerable amount of money to this institution. This, if for no other reason, should entitle the students to not attend a few lectures if they so please.

Compulsory education in Quebec ceases at the age of fifteen. Most of the students here are over this age, and would not be here if they did not want to further their studies.

Stephen Leacock had the right idea when he wrote, "If I were founding a university I would first found a smoking room; then when I had a little more money in hand I would found a dormitory; then after that, or more probably with it, a decent reading room and a library. After that, if I still had more money that I couldn't use, I would hire a professor and get some textbooks."

B.K.M.

## ORGANIZATIONAL PICTURES for CLAN MACDONALD

Lists of Dates and Times that group pictures of the campus organizations will be posted on the bulletin boards this coming week.

If your organization has been omitted, write a note to Box 334, Clan Macdonald.

Please check for time, date and place.

## LETTERS to the editor

Dear Sir,

We feel that the infirmary is not as efficient as it is made out to be. The other day when one of the residence maid broke her wrist while falling down stairs, she was left lying there for three-quarters of an hour before anything was done. The nurse came over, looked at her, and left the students to put cold cloths on her head to stop her fainting spells. Then one of the students drove her to the hospital. There was nobody in the infirmary that could do anything for her. What is the infirmary for?

A few days ago one of the students burned herself badly with boiling water and was in great pain. Again the nurse was consulted but nothing could be done for her. In fact, she felt her presence was even necessary although it was a second degree burn.

Another situation concerns the X-Rays. We feel there should be some provision made for having X-Rays taken out here. Many times a student has to travel into Lachine Hospital to have X-Rays taken for an injury and many times the doctor does not bother to look at the injured part, but only diagnoses the X-Ray. If the X-Rays are negative, he sends the student away with the feeling that he has been faking. Many people are forced to go to outside doctors for correct diagnosis. Why must students often 'phone their parents before anything is done? We know one recent case of a girl who broke her foot in four places. Her case was diagnosed over the 'phone and the doctor assured the nurse that it was probably only sprained. Still not sure, the girl 'phoned her father who took her to have it X-Rayed.

What does the infirmary feel their role is? We, as students, feel it is their duty to see that there is always a capable person on hand to attend to cases such as the above. How can the infirmary possibly know to what extent an injury is if they do not take the trouble to come and see? Every sick or injured student likes to have the assurance that if they are badly hurt and feel so themselves, a nurse or a doctor will be brought to them. Why make a person suffer all night long and tell them to come back in the morning? Why do we always get the answer: "Come back tomorrow if it still hurts or you still feel sick"? What can be done tomorrow if nothing can be done today?

Lynda FRANSHAM,  
Barb Dobb.

## Council Corner

Last Monday night the Student's Council held a meeting. For the second consecutive week I was there to report the business discussed. This was extra-ordinary because usually, cannot hold down a job for more than one article.

The amendments to the W.A.A. constitution were presented to the Student's Council. The following is a list of some of the changed.

The Kindergarten Teachers, being such a small group will be represented with the Diploma teachers, The T. P.s will have two reps, and one rep. will come from each section of Class II diploma and degree teachers.

The woman's sports editor of the "Faily-Ye Times" will be a non-voting member of the Executive. Other members of the executive: — First Vice-President must be a Soph. Phys. Ed., Second V. P. must be a Soph Intermediate, Secretary must be a B. Sc. II, and Treasurer must be a B. Sc. III.

All managers are to present their programmes to the representatives one week before the commencement of the sport.

Managers are to see to it that players attend practices as attendance will be recorded at practices as and games.

The constitution is to be read at each meeting of a new Executive or new Representatives.

These amendments were passed by the Council, but, due to some changes required, the new constitution will have to go back to the W.A.A. for the changes to be passed before the constitution is adopted.

There was a suggestion that a box for outgoing mail be placed in Brittain Hall. This was discussed and the general consensus was that it was discussed and the general consensus was that it was a good idea. Probably something will be done about this in the near future.

The auditors' report on the financial affairs of the Students' Council was presented. It was voted that it be included in the "Faily-Ye Times."

## Foreign Affairs Conference

State University College - Plattsburg, New York

Week-end - December 7-9.

Subject - Africa

Speakers - Dr. D.W. Kruger

Dr. A.A. Al-Marayat

Students' Council is willing to pay transportation and expenses of two delegates.

See Sue Ward — Laird Hall or Al Crowe.

## COMMUNITY CHEST '63

This year's objective for Community Chest is \$1200. this comes to about \$1.00 per student.

Macdonald College Community Chest for 1963 is supporting the following organizations: CARE, F.A.O. (Food and Agriculture Organization of the United Nations), Montreal Children's Hospital, and the Cancer Research Society. These organizations couldn't carry on their tremendous programs of teaching, research, and assistance to the under privileged both at home and abroad, if it were not for the combined appeal of Community Chest.

Starting early in November the Class of '65 (Soph Aggies and H.Ec.) will be selling Macdonald College Christmas Cards. They will be sold in the Stewart Hall foyer, under the clock in the Main Building and in all three residences. We hope to sell 600 dozen card (last year 513 dozen were sold)

Community Chest Week is Jan. 20-27. Many activities have been planned to help you part with your money painlessly. The following are the main events of the week:

Monday night: Country dinner and square dance complete with a western band, all for just 1.00

Tuesday night: Monte Carlo Night

Wednesday: Penny Drive. This year's penny drive is on an interclass basis, so start saving those pennies now.

Thursday night: Interclass Variety Show. Class points for participation will be awarded.

Friday night: Skating party (tentative)

Give generously

Support your Community Chest

Ruth Garland

## S. T. S.

The past two weeks have been busy ones for Margaret Ann Farmer and her executive. On Friday, Nov. 2nd a meeting of all the representatives of the advisory groups was held. From the representatives who were present, five executive members, one representing each class, were elected to the executive committee of the Student Teachers' Society. The complete executive is as follows:

President	Margaret Ann Farmer
Vice-President	Rick Laverty
2nd Vice-President	Mike Stirrup
Secretary	Daphne Sanderson
Treasurer	Barbara Elliott
Freshman Executive Members	Barry Stevens
TP	Jane Rice
2S	Marshall Hetherington
1G	Tom Levy
Soph.	Sue Gerson

The first executive committee meeting was held in the Student Council house on Monday, Nov. 2nd. All members were present. On the whole the meeting was very lively and spirited with a great deal of discussion and controversy.

Four main issues as well as many minor problems were discussed and dealt with. The first main issue on the agenda was the election of an honorary president. Prof. John Calam was elected to the post. The committee extends thanks to Mr. Overing for his valuable advice during his term in office.

The next item on the agenda was the apparent reluctance on the part of some of the students to pay their STS fees. It was thought that the reluctance may be due to the fact that students felt the STS to be doing nothing for them. This discussion led into the next item on the agenda which was a discussion of the purposes and functions of the STS. It was thought necessary to point out that through STS, the student teachers have membership and representation on the PAPT. Furthermore, the STS sponsors many events during the year. Speakers are brought to Macdonald to talk on many educational subjects. The Society makes financial contributions to a number of different campus organizations to help them with their programs. The STS has given money to the Community Chest and sponsors a trip to Montreal for the benefit of our foreign students. The STS runs the Graduation Banquet at the end of the school year. Although the STS does not sponsor many social activities, it does further the educational interests of the student teachers at this college.

The next item of discussion was the Teachers' Prom. The executive expressed its hope that the event would be a success.

The meeting was then adjourned.

Rick Laverty

The STS will run an article in this paper each week and students are urged to contribute any news or articles concerning student activities on campus.

## CEASAR AND CLEOPATRA

Within three weeks Macdonald College will set out on a barge down the Nile in far-away Egypt. You have no idea what a hilarious but fascinating place Egypt can be in the hands of George Bernard Shaw. Cleopatra, played by Marion Dawe, is a young girl as playful and appealing as any child, until mightily Caesar, played by Rudy Lindberg, brings out the woman in her. To get his way Caesar must persuade Cleopatra of her tremendous power. Like any woman she is quick to expiriment with her new-found ability to rule, and even overthrows her beloved but domineering "nana" Ftataetea, played by Joanne Dinning. Caesar is rather appalled at Cleopatra's ruthlessness. If someone has the nerve to get in her way, over the parapet he goes!

There is a large and excellent cast; yet several small speaking parts are still ripe for the taking. You need not be a Bob Goulet or even an Elizabeth Taylor. Your own ambition to ham it up is all we need. Come to the Assembly Hall today at 4:30.

We also need someone, perhaps with an interest in ham radio, who would enjoy working on sound effects in this production. If this is for you, turn up same time, same place and we'll give you the job.

Corinne SCHNEIDER,  
Julia WILSON.

## OLYMPIC GYMNASTIC MOVIE

The Macdonald college Phys Eds. are presenting the 1960 Olympic Gymnastic movie on November 15, featuring in person Captain J. Gillanders.

Captain John Gillanders is the vice-president of the Amateur Athletics Union of Quebec and coach of the 1960 Olympic gymnastic and fencing teams. He will be present to comment on the film.

Instead of charging admittance to cover the cost of the film there will be a silver collection at the door. All those interested are urged to attend.

The program is scheduled to commence at 7:30 p.m. in room 224 of the main building.

Larry Bowen

CONCENTRATION!

## CAMPUS CLIPPINGS

Phil KNOX

**THE WORLD AT LARGE :** One of the many consequences of the actions taken by the United States a few weeks ago was a supposedly profound display by a group of "mature" university students, who for the most part (or so it seemed), agreed with those steps taken by President Kennedy. These students took it upon themselves to demonstrate their emotions through their yelling and cheering. But, did they really know what they were yelling about? Were all the facts clear in their minds? Did they demonstrate in favor of the United States because they felt a strong desire in their hearts to do so, or because they were merely going along with the rest of the crowd? After all, conforming with the rest of the group is an essential thing in our society today! Upon talking with one of these rather spineless creatures, I learned that his interest and support had been extended, not for the idea or meaning behind the demonstration, but because he had had his picture taken by a press photographer and because he had appeared on television that night in films of activities from the preceding day. These two thousand students, by disturbing the peace and because of ensuing brawls, were going against the very intentions of the man they were applauding. The President had stated that he was against physical force; and yet when one particular student shouted something against the embargo of Cuba he was immediately pounced upon and beaten up. I am convinced that these "dogooders" were merely out to let off steam and because of a lack of something better to do they decided to get everyone worker up to the extent that, as far as they were concerned, war had already been declared. These ideological-type of demonstrations are all very nice and are a good way to keep warm on a cold day; but, what do they prove? Would each and everyone of those exuberant "men and women" fight for their country if we were to go to war tomorrow? I think not! Is it not about time that these immature beings grew up and realized how they could put their fiery potential to a better use? This holds true for most of these slack groups which demonstrate for a cause of little significance. Half of them will not know what they are fighting for; and the other half probably couldn't care less! Too much emphasis is placed on these "spur - of - the - moment" campaigns. We can all benefit from that particular, ridiculous display of a couple of weeks ago and see ourselves as we really are — weak, jelly-like children whose favorite game is still "follow the leader".

**FAST FAST RELIEF :** Nowadays, when we are all threatened with being blown off the face of this dearly, beloved planet which we like to call Earth; and when we are all faced with the equally nerve-wracking threat of term papers and examinations, we are all in need of something that will give us instant relief from our sufferings and make us see the brighter side or life — just for a change! Some people might take a visit to a fortune-teller to find out what the future holds in store for them. Others might take the easy way out and jump from the tower of the Main Building (this method is not advocated by the writer). However, I have come up with a new and different slant to this need of self reassurance. Why doesn't someone open up a business where a frustrated body could go and seek his I.Q. rating? It could be called — **I Cue, You Pay** — or something to that effect? Since most of us here at Macdonald have normal or above-normal intelligence (or should have) we would all find satisfaction in being told this fact. Not all of us know how smart we are! After such a visit (and they could be kept up indefinitely) the patient would feel as if a heavy load had just been removed from his back. He would be more conscious of his potential and would be more able to cope with the problems around him. This is only another of those idiotic, modest proposals; but, I ask you to think again. How many of you would do better if you knew you were capable of doing so? Heh! Heh!

**POINTS TO PONDER :** Wanted: someone who knows how to operate the lights and the microphone in the ASSEMBLY HALL... Witnessed last Monday was a large crowd around the entrance to the A.H. lecture. Were the students eager to get in or is it true that they were required to sign the ATTENDANCE SHEETS en masse? That "mass" made quite a mess! What will come next?... Let us ponder a moment on the subject of STEWART FOYER. Firstly, why not put that gigantic fireplace to good use? Cold nights are on the way. The other matter that has been bothering me this week is the display of pictures on housing in Canada. What are they trying to sell — houses or the Government?... Finally, someone suggested that a large bottle of GERITOL be sent to Room 036. Wonder what they meant? P.S. Only thirty-eight shopping days left until Christmas!

**BEEF OF THE WEEK :** Is it my imagination or are they first and second year students who are using the mezzanine floor of the library for study purposes? It seems to me that I saw a few Freshmen up on the "balcony" just the other night. It might be pointed out here and now that the particular place in question is strictly out-of-bounds to all students except graduates and the faculty. Such students who have infringed

(Continued on page 6)

# WELL GIRLS ITS OVER!

Well, girls, now we know what it is like to spend money on dates; get up enough courage to ask for the date in the first place; do all the honors with regards to opening doors, lighting cigarettes; and we also found out what it is like to wait in the foyer while a certain party or individual spends an extra ten minutes in front of the mirror.

Yes, Sadie Hawkins Week has come and gone for another year. True to form, the girls gallantly opened doors, lit cigarettes, escorted the fellows to classes—bearing the burden of their clipboards and texts. The girls were also looking forward to the day when they could sit down to a meal without any interruptions. It must be the weather that affects the appetites of people around here, for what other reason could there be for so many males to require second helpings? (By the way, I have yet to see any fellow carry out a girl's tray.)

The Sophomore Home Ecs. had a good idea when they put the names of the Sophomore Aggies in a hat and drew for dates. It was almost like military conscription; with a recruiting officer in the foyer making note of the destinations and intentions of the Aggies.

The class play was never so well attended as last Wednesday.

The local Hallowe'en party was a howling success,

even though some people are rather hazy about the events. The local yokels put on quite a show for the student body. It was better than New Year's!

Thursday night, the fairer sex provided the after-dinner entertainment in the nature of a "Girlie Show."

Friday night, "Kirk's Court" was the big attraction. Four innocent and rather embarrassed girls were called before the court in various stages of dress and undress. Needless to say, the unprejudice verdict for all was guilty. Since I am allowed to give my personal opinion in this article—after all, it is all over—I could, and did, admit that it was a lot of fun. But try and convince me of that at dinner time last Friday.

Saturday brought much confusion and merriment to all residences, as those who were attending the dance tried to find old or odd clothes. The women's rooms were cluttered with various fruits and vegetables, as they tried to fashion courages of the same for their dates.

High spirits prevailed throughout the dance as it had all week.

"Sadie Hawkins Week comes but once a year, And when it comes, it brings good cheer."

QUACK, QUACK!

With Allison's loving touch

The girls at Macdonald will never be

We heard that they were hard up but this is ridiculous!

An animal science calf inspection

## SKINNY BROWN'S CORNER

Well, I thought I should write something in this paper. Then all of a sudden I did not know what to write about. So I put down my pen, stretched 6'3" on the bed, and pulled at a cigarette while 360 seconds sailed by merrily with the smoke from my cigarette. At the end of this period, I was still blank. If any thought crossed my mind, it was the thought that my feet were still dangling over the bed. I guess, at the end of the year, I will walk up to the authorities concerned for rooming and ask for my change. Two seconds later and like a bolt from the blue, the thought occurred to me — I reached for an eye opener and believe it or leave it, ideas came sipping in slowly. I saw clearly and thought clearly. That's it — jokes, riddles and proverbs that I want to write and from now on I shall write them unless I forget to remember not to forget. If this happens you will please forgive my forgetfulness. The proverbs are for you to think about, the riddles are meant for you to "give your brain a wracking and find the answer it is lacking" within seven days when the answer will appear in the next issue; and the jokes are meant, of course, to wiggle and jiggle and tickle inside you.

This week, however, I am adding a poem. It is neither my original work, nor do I know the poet. The words were given to me when I was at home, by an old man.

They are interesting and true

And I wish to share them with you

## MONEY — MONEY — MONEY

"Money makes the mare to go"

Is a saying old and true

And when you've got the ready cash

Your friends will stick to you like glue.

But no sooner the cash is gone

Those friends you thought sincere

Will turn on their heels and quickly disappear.

And then you'll murmur to yourself and say

I must have let those artful friends

Make me their ready tool.

If fortune smiles on me again

You may bet that the best I would rely on

Is M-O-N-E-Y.

M-O-N-E-Y is the thing to give you joy

And when you've got the L.S.D.

Everybody seems so free.

Friends you never knew before

Flock around you by the score;

And girls will try your love to win

All for M-O-N-E-Y

P.S. (a) L.S.D. stands for the English monetary units, shillings and pence.

(b) M-O-N-E-Y must be spelt out to get the effect of the line.

PROVERB — What is one man's food is another man's poison.

RIDDLE — If I were in sun and you were not in sun, what would I be?

JOKE — What is the difference between a lover and a rejected lover?

ANS. — One kisses the misses and the other misses the kisses.

THE SAINT

## Drama Under Fire . . .

(Continued from page 1)

suffer because its coinciding with the Green and Gold. It definitely would!

The final point deals with the only beneficial aspect to this whole combination scheme that I can see. Perhaps this proposed combination might end the disputes over equipment. Now, there is a good deal of argument about who owns what, whether Lit. and Deb. owns an item, or whether it is the property of the Green and Gold. But here again a problem presents itself. If the combination were effected, to whom would all the material presently used by the Drama Club go to? Would it go to the combined Green and Gold, Drama Club, or would it remain Lit. and Deb. property? Anyhow, I think it is rather silly to argue about what belongs to whom. It is all paid for the same funds, the student activity fees. But the best solution is the continuance of condition as they were before: the Green and Gold under its own executive, and the Drama Club under the Lit. and Deb.'s jurisdiction.

In this article nobody is accused of doing a bad job. I only want to point out that Drama and Green and Gold should remain separate because the Green and Gold as well as the Drama Club would suffer. However if people are bound on charge, it might prove a solution to put Green and Gold under Lit. and Deb.'s jurisdiction, where, I believe it was originally anyhow.

J. W.

## NOTE

We on the Failt-Ye staff would like the opinions of other people on this issue, so that all sides of the question can be aired properly.

Macdonald's Distractions

## I. S. O.

The International Students' Organization, as the name suggests, is an organization of all international students on campus. This definitely takes into account the Canadian students.

Its main aim is to foster international friendship and goodwill among all Macdonald College students. Suffice it is to say that being students we are able to observe and cultivate the good things about our fellow students. This in the long run will help us all to understand the varied problems which face us.

The ISO meets once every fortnight in Laird Hall. Generally at these meetings we listen to talks by speakers from, and from outside of, the campus. At other times informal discussions take place.

We of the ISO welcome everyone to join us in our bi-monthly meetings and hope that you will enjoy them.

Rogers A.D. Jones,  
President, ISO

## The Perfect Woman

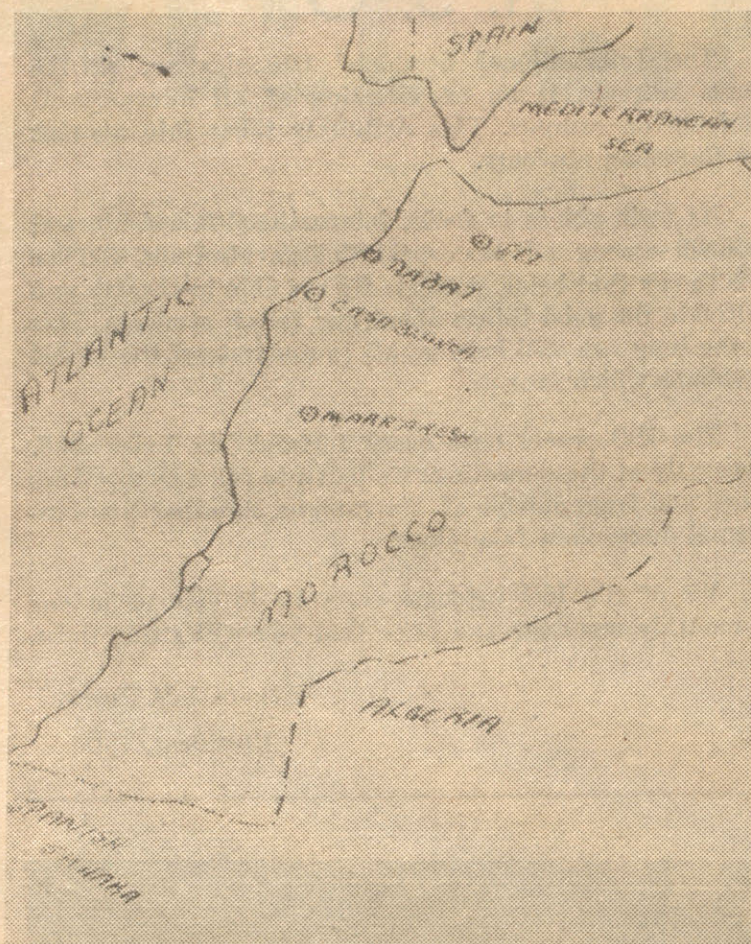

I think that I shall never see a woman lovely as a tree. A woman with a trunk so slender without a girdle or suspender. A tree needs no support I trust. A woman does for sagging bust. Trees all dye the natural way and do not change from day to day. Poplars have an easy grace. Women need a made up face. But though no lovely girl I see, I cannot make love to a tree.

Miss Bunting, what's all this rubbish about our janitor winning 50,000 dollars in some stupid sweepstakes.

## FOREIGN STUDENT REPORT

Let me first introduce you to the geographical position of Morocco extends along the Atlantic and Mediterranean at northwest corner of Africa. It was divided into French and Spanish Morocco and the international zone of Tangier across from Gibraltar. But ever since 1955, the country acquired its independence from both France and Spain and today Morocco is a politically neutral country. The total area of Morocco is 520,760 square kilometres and has a population of 10,500,000 following the Mohammedan religion. The main cities of Morocco are Casablanca, Rabat which is the capital, Marrakech, Fez, Tangier and Mequies. Morocco's economy is essentially agricultural because of abundant rainfall and its main crop is wheat of which the total production reaches five million tons per year. Also barley, maize as well as olives, vines, oranges, figs, are grown because of the Californian type of climate. Numerous cattle are reared and Morocco counts ten million sheep. The Atlas mountains and enclosed plateaus are in part covered with forests of cork-oak, cedar. The plateaus however are of little use except as sheep and goat pastures. The Saharan plateau has a number of oases with olive palms. The country's natural resources are important. Phosphate rocks (for manure) is exported, tungsten and lead are mined. The fishing industry also plays an important part with the canning of tuna and sardines.

The history of Morocco is very interesting in the fact that it is roughly coextensive with the ancient Roman district of Mauretania. Islam was brought by the Arabs who first invaded Morocco in 683. An independent state was first established and in 788 Moroccan power reached its height under the great dynasties of the Almoravides. European encroachments began in 1415 with the Portuguese capture of Ceuta, city situated in Spanish Morocco, and subsequent seizure of most of the main ports. However in 1578, the Moors defeated the Portuguese at the battle of Alcazarquivir. The Portuguese remained in Morocco some five hundred years and left many traces of their civilization. The present ruling house, came to power in 1660, succeeding the first Sherifian dynasty. In the 17 and 19 century Morocco was mainly a pirate base, but late in the 19 century, its strategic importance excited the interest of European powers, and explosive situation was soon created by intensive rivalry. A temporary settlement was reached by the Algiers conference in 1906, this conference assured the protection of German investments and gave France and Spain authority to police Morocco. However peace was broken by several clashes, notably by the Agadir incident.

In 1911 Germany agreed to a French protectorate in Morocco in exchange for French territory in Africa. French and Spanish protectorates were established in 1912. In World War II, French Morocco remained loyal to the Vichy regime after the fall of France (1940). Allied forces landed at major ports on November 8, 1942 and on November 11 all resistance ended. After the War, an independent movement led to the exile of the Sultan Sidi Mohamed Ben Yusef. In 1956, following continued nationalist agitation, he returned to Morocco with full recognition of Moroccan Sovereignty from France. Moroccan cities are very beautiful and many of them could easily be compared to Californian cities. For example Tangier could be compared to San Francisco and Casablanca to Los Angeles. Ca-

sablanca (white house) is the largest city and was the scene of a history making conference between president Roosevelt and Prime Minister Churchill in 1945. It is mainly the commercial city of the country because of its gigantic harbour and good geographical location. From Casablanca, it is easy to travel to the capital Rabat which is only 60 miles away. The modern districts of the capital with wide boulevards and modern buildings offers a contrast to the Medina with its narrow streets and bazaars. The Hassan tower is the remainder of a mosque which was built in the 12 century and the Chetouh gardens give Rabat an exotic touch. Marrakech, the capital of the south, Minister Churchill's favourite retreat and as he calls it: "My beloved Marrakech" could be compared to the Garden of Eden. It is surrounded by red ramparts, it is full of flowers and old monuments. It is very easy to see in a street corner a snake dancing to the shivering sound of the flute and in the background the image of the snow-covered Atlas mountains give this city an eastern charm. Each hour, each moment, each step brings new discoveries and pleasures and it is no wonder that great painters like Matisse, Delacroix, came to rejuvenate their spirits in this splendid paradise.

## ROYAL NOTES

By Pam Carter

Last week the executive of the Royal met for a second time with the Board of Royal Directors to discuss the progress being made on the Royal and bring the directors up to date on any new developments.

Ray Nicholson was elected as our new secretary.

This year we are hoping to make many new changes for the better, one of them being the Award's Night Presentations. In past years, awards for the various competitions which took place during the Royal have been awarded to the winners just before the Friday night production of the "Green and Gold". This has never failed to produce all kinds of difficulties. Judges have sometimes not yet reached their final decisions by this time. Also, the stage is being prepared for the "Green and Gold" and cannot be used adequately for awards. There are usually a great many awards to be presented, making the program quite long. Such is the problem which we are faced with again this year. We would appreciate suggestions which might help to improve this situation and would ask you to mail your ideas to:

Royal Box 61  
Macdonald College.

YOUR IDEAS are what will make YOUR ROYAL. If there were things last year which you think might be improved upon in the Royal this year, please let us know by speaking to us or mailing your ideas to the above address. We will certainly consider them.

## LEGORE'S COLLEGE LAWS

## I - The law of examination marking

The marks given for an exam are inversely proportional to the severity of the test, providing that the mood of the professor remains constant. Where,

M = marks  
S = severity of the test  
W = mood of the professor  
K = constant.

$$\frac{M}{S} = WK \quad \text{therefore} \quad \frac{M}{S} = WK$$

## II - The law of mathematical creating

The answer obtained by a student for a given problem at any instant is directly similar to that of his neighbouring classmate at the same instant, provided that the diagonal stare and eye rotation of the latter remains constant. Where,

A = answer to the problem done by the student  
N = answer to problem done by classmate  
L = diagonal stare  
E = coefficient of eye rotation  
K = constant.

$$A = NK \text{ times } L + E$$

$$\text{therefore } K = \frac{A}{N(L + E)}$$

III - The combination of both  
— "The combine law" —

The marks obtained by cheating are independent of the severity of the test in the same way as the mood of the professors is independent of the cheaters diagonal stare.

The equation for the Combine Law is beyond the scope of this newspaper, hence it is omitted.

Audley LEGORE

## Campus Clippings . . .

upon the rights of the graduates should be dealt with in the proper way (this "way" will not be stated at this time). I, as well as most others here at the college, hold great respect for those who have completed four years of college and I feel that they are entitled to a little privacy away from the rest of the "flock". To all those concerned, there is a sign at the foot of the stairs which states very clearly that the only ones allowed to ascend to the upper echelons are "Graduates". The trouble around here is that too many people do not know how to read.

## AGRONOMY

For those who are not familiar with the word "Agronomy", a brief outline of its meaning and duties of people involved in this field is given below.

Agronomy deals with the science of field crop production. In as much as crop production can be divided into two broad phases, viz plant and soil, the option is designed to permit students to specialize. In the Third year of university all students electing agronomy take the same courses, selected to give a broad base in fundamental sciences. In the fourth year the student elects one of two phases, viz, plant phase including plant breeding or soil phase. This includes the study of such economic crops as cereals, forages, oil seed fiber and feed crops.

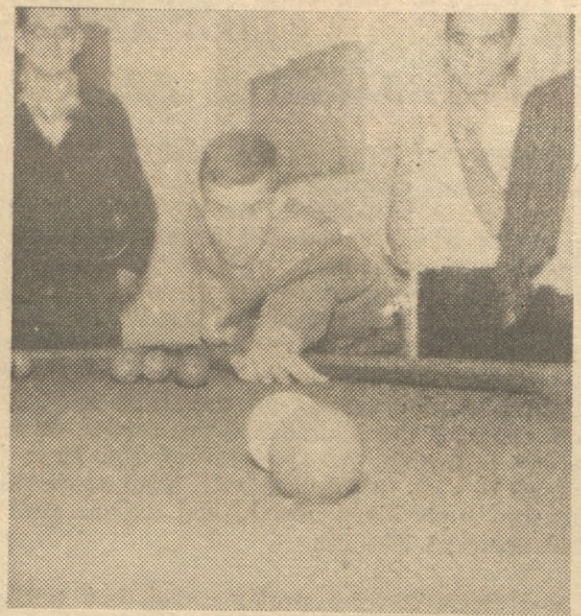

Many have the idea that graduates in agricultural Science have one choice after they graduate and that is to farm. This is not so. Graduates in Agronomy have a display of choices depending upon their level of training. A few positions are research officers, Professors at Universities, seed inspectors, Agricultural Representative extension, and position with various industries such as feed Co., Tobacco Co., Brewing and Melting Co., to mention only a few.

## Whatever became of:

G. Fawkes,  
CLASS OF '08?

Voted the student likely to rise highest in his class, Guy will be remembered for his major thesis "The Raising and Lowering of Buildings by a Revolutionary Method". Cognizance was taken of this project by Parliament. Always keenly interested in problems of rapid movement of mass, Mr. Fawkes became attached to an early space programme which failed due to non-ignition of the propellant. Results of some of his earlier experimental space work are clouded due to excessive blast-off. However—who knows?—due to good old Guy, this college might well have been the first to put a man on the moon. Conclusive evidence must await more sophisticated lunar exploration.

Whether you are aiming for the moon or some less ambitious objective, your chances of success will be enhanced by a Savings Account at "MY BANK".

## MEN'S ATHLETICS

### INTERCOLLEGIATE SPORTS

Last Saturday Mac played host to the University of Montreal and, despite over 150 yards of penalties against us, our team came out on top 23-12. It was a bitterly cold day and because of this and the strong wind, the football was difficult to hold on to. Therefore, both sides remained primarily on the ground, and all touchdowns except one where scored rushing. We opened the scoring as Sam Portch carried on the option and then went ahead 13-0 on a 50 yard gallop by Rick Kool. However the Montrealers, gaining yards on penalties only, got two; one on a drive up the middle and the second on a reverse around the left side. At the end of the first half we were ahead 13-12. In the last half, Kool again picked up 6 for us and Doug Carpenter kicked a field goal leaving the final score at 23-12.

The offense gave a pretty consistent performance led by big Stu Lawrence, who, played a good game every game. He opened big holes for fullback Rick Kool and on one of them Kool went fifty yards for a touchdown. Bob Simms, our 205 pound left guard also turned in a well played game, working both ways. Nick Twerdon, the only sad note of the game, decided to hang up his cleats for good. He feels that after 10 years of football he has lost his speed and stamina and although it hurts him deeply and gives the entire season a sentimental finish, he has given up his brilliant career.

The defense, gave up two touchdowns, mainly because of penalties, but also played a good hard game. In the first quarter the Montrealers did not move the ball at all as the line, and, the linebackers hit their backs for a loss time and time again. They completed only three passes and only one was for a big gain, while Gary Walto knocked down two and Dave Lees intercepted one.

Mac did considerably better than last year and this was mainly due to the help and guidance of the coaches. The team gives Coaches Hughes and Shugrue and Coach Pugh a sincere thanks and wishes them all the best in the coming season.

#### Final Point Getters:

RICK KOOL: 36 points  
SAM PORTCH: 36 points  
DOUG CARPENTER: 26 points  
JIM DICKIE: 21 points  
ROSS ARMSTRONG: 12 points

## Interclass Sports

### FOOTBALL

(games up to Nov. 4)

Teachers 2 vs Agriculture 3.  
LEAGUE 2  
Agriculture 1 vs Agriculture 2.  
Agriculture 3 vs Teachers 2.  
Agriculture 4 vs Teachers 1.  
Dips vs Teachers 3.

## PAT BAKER

### NEW COACH

Pat Baker has been elected as this year's basketball coach. He has been well chosen as this report of his past experience shows.

During high school he spent four years as captain of The Westmount High School teams, due to his outstanding ability.

Later, on the Montreal Basketball League, he played for the H. Aces in the Junior Dominion Finalists 1952-53, and on other Senior Montreal Basketball League teams during high school and after graduation.

He was captain of the Sir George Williams University teams 1954-57 and played on the City and Provincial Champions team in 1956. He was a Gill Trophy winner in 1957. (This trophy is awarded to the student who combines academic achievement, athletic ability, leadership, and fair play).

Pat coached the Westmount Senior B team for two years and was a coach in John Rennie High school for three years.

Obviously, because of his vast experience, both as a player and a coach, a better choice could not have been made.

RICK KOLL  
ON  
50 YARD RUN

## HARRIER

The big long distance running event of the year is fast approaching, in fact it is tomorrow. The entries are to be held at 11:30 and the race itself will begin at 11:45. The entire course is approximately two and a half miles and gives the competitors a good view of the college. The layout is posted on the athletic board in Brittain Hall for those interested. To place a team must have four finishers and the team with first four finishers is obviously the winners. The boys have been practicing religiously for some time now and would appreciate it if you would come out and support them or at least cheer them on. Let's not disappoint them!!

## WOMEN'S ATHLETICS

On Monday night at 7:00 P.M. under a rather cloudy sky, but a crisp, cool air, the Soph Fizz-Edd maidens challenged the somewhat burly, husky men in the same class to a game of tag football on the snow-covered field.

The atmosphere was tense as referee Larry Bowman blew the kick-off whistle and fifteen bull-headed women charged down the field, as center, Mary "Pork-Chop" Yates kicked the ball. The men were slightly outnumbered as only eight of them turned out: The rest on doubt petrified of the idea of a girls team defeating them. However, the rules being somewhat modified, with tackling of the girls prohibited, the two sides strove hard to move the ball down the field but with little success, until finally Marilyn Misner kicked the ball into the end zone. However she was pounced upon by George Koski who ran all the way to the other end of the field for a touch down. This was all to no avail as the referee called the ball back to the girl's one yard line because one of the BRUTAL gents had been rough on a gentle young maid. Immediately after this, our tiny, mouse-like star, Linda Morrison managed to squeeze over the end line for a touch down.

The men made a comeback after this and managed to score a touch down to even up the score. However in the last minute of play, the girls scored a point to win the game with the grand score of 6-7. With spirits somewhat low and their ego dampened, the fellows were escorted back to Laird Hall foyer where Bonnie Eccles and Fran Laurie had done a wonderful job in preparing doughnuts for everyone.

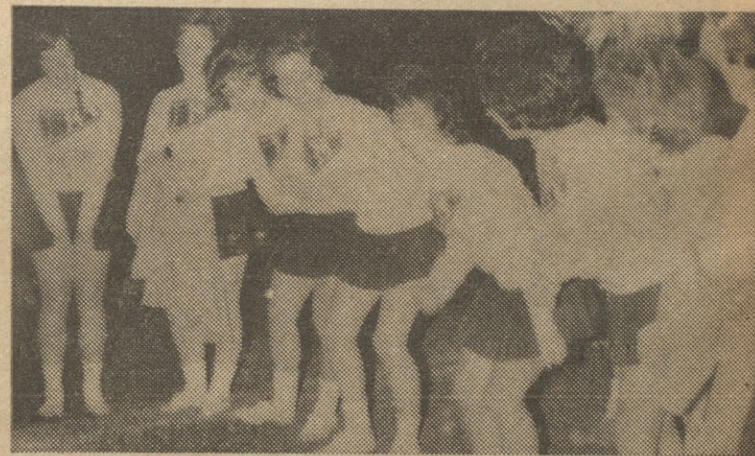

Thus the evening ended happily despite all the bumps and bruises received, because of the fact that a few males in particular refused to adhere to the no-tackling rule.

#### Interclass basketball.

The interclass basketball schedule is in progress now and will continue to Thursday, December 6th. The games are held every Monday, Wednesday, and Thursday, from 4:30 to 7:30 P.M. So if you are not already on your class team, see your class rep today. Anyone who participates can earn points for the interclass shield. The games are only ½ hours long, so let's see as many ladies on the basketball courts as possible.

#### Intercollegiate Hockey

Intercollegiate hockey began this past Wednesday and in the future on Wednesdays from 6-7 P.M. at the rink. Anyone interested in thoroughly enjoying themselves should turn out to these practises.

## CURLING

At the recent Curling Club meeting plans were made for the season at hand. The first meeting of all students interested in curling took place on Wednesday evening. Two curling films were shown at this time.

This year the match committee anticipates twenty teams and is prepared to draw up a schedule to accommodate this number.

It should be noted that the Curling Club is not interested in the sport alone, but it is also concerned with social aspects of the game. On Thursday, November 15, there will be a party at the Red Barn. We would like to see everyone at the "barn" because we're sure it will be a good time for all.

Last year, you may recall, a team was sent to Laval University during winter carnival in Quebec City. This year it is our intention to send teams to represent Macdonald at other universities. The lady curlers will be interested to note that we are arranging to send a girls' team into intercollegiate competition.

This does not mean that everyone must be an experienced curler. Beginners are also very welcome. Practices are provided for those who wish to take advantage of them. Instructions will also be given by some of the "old pros" in the group. There will also be regular scheduled games.

Since only six teams can play at once, there will be ample opportunity given for those students who wish to go home on weekends.

Curling begins this Sunday afternoon, November 11, at 2:00 p.m. On behalf of the Curling Club I would like to extend a cordial welcome to everyone to come out and have fun.

Locksley Trenholm, Pres.
